Organized by

## Internal Quality Assurance Cell (IQAC)

### VYSYA COLLEGE, SALEM.

## ABOUT THE COLLEGE

Vysya College is a leading Co-educational Institution, Re-Accredited with 'A' Grade by NAAC, affiliated to Periyar University, Salem. It is located at just 7 Kms. away from Salem city on the Salem-Chennai National Highway in a sprawling area conducive for learning. The college is established in the year 1990 by the philanthropists of Vasavi Vidya Trust. The college has been rendering exemplary service in the field of higher education for the past 24 years. The College offers 10 UG programmes, 9 PG programmes and 5 Research programmes including MBA and MCA in the name of 'Vysya Institute of Management Studies' with state-of-the-art infrastructural facilities.

Vasavi Vidya Trust extended its service in the field of higher education by offering B.Ed programme (Affiliated to Tamilnadu Teacher Education University, Chennai) in the name of 'Vysya College of Education' from the academic year 2007-2008. In addition to that, our trust offers MBA and MCA programmes in the name of 'Vasavi Vidya Trust group of Institutions' (Faculty of MBA/MCA) affiliated to Anna University, Chennai and approved by AICTE, New Delhi since 2009- 2010.

## ABOUT THE SEMINAR

In the 21st century, an ability to work with information and communication technologies is becoming very essential to education, life and workplace success." ICT Digital Literacy should be considered as a basic skill by educational systems, something taught to and assessed for all students. Teaching people should be competent users of ICT technologies and usage of statistical tool has become very important for all researchers, hence this conference will provide a platform for all teachers, students to share their opinion about ICT and also to learn and enrich their knowledge on ICT in education.

Liberalization, privatization, and globalization constitute the current social, economic, technological and political space within which television and all other media have to exist, survive, and function. Revolutions in information and communication technologies have reduced national boundaries to meaningless lines drawn on maps. And in the new scenarios, education has been identified as one of the twelve main services, which need to be opened up for free flow of trade between major languages. The demand for education far outstrips the conventional system's ability to provide it, leaving no alternative to the use of technology in education. We are at a critical juncture, when the new technologies of communication - from the individualized computer assisted learning systems to the more mass directed radio and television today offer an unparalleled opportunity to reconsider conventional educational and learning practices and institutions.

ICT is critical particularly in the context of global development goals, the increasing demand of education for all, and the inability of existing educational systems to meet such a demand without support from the ICT. The Conference discusses the role of ICT in education, their characteristics, strengths and weaknesses, and success factors when using ICT in education.

## THEMES OF THE SEMINAR

The seminar will focus on the central theme of 'Role of ICT in Education and Development- Opportunities and Challenges' with the following thrust areas:

- Teachers, Teaching and ICT
- Specific ICT tools in Education
- Educational Content Dissemination via ICT
- Emotional, Psychological and Cultural Impact of ICT on Learners
- Current Implementation of ICT in Higher Education
- Positive and Negative impacts of ICT among Students
